

## **Pascal Hamisu**

P. Hamisu received his Dipl-Ing (MSc) degree in Electrical Engineering and Information Technology from Technische Universität Darmstadt, Germany in 2006. In 2004 he received a certificate for an International Program for New Media Technologies and Business Practices at IMEDIA, Providence RI, USA.

Prior to a position at Fraunhofer Institute for Computer Graphics IGD, he gained experience in several research projects as a student research assistant. He is currently participating in both German national and EU R&D projects for developing Ambient Assisted Living solutions for the elderly as well as pursuing a PhD degree.

His research interests include pervasive computing, inter-sensory interfaces to integrate vision, speech and gesture modalities for augmented computing via intuitive user interfaces. Other interests are semantic modelling of wireless sensory data in an Aml environment for human behavioural analysis and scene reconstruction.
