

Harald Reiter

Harald Reiter received his M.Sc. degree at the communication-engineering department of University of Darmstadt, Germany in 1988. He started at Broadcast Television Systems where his focus was on telecine systems for high-speed data conversion. Since 1993 he works at the Philips Research Laboratories Aachen in the field of medical applications. 1999 he started concentrating on systems and applications for Telemedicine and Personal Healthcare.

Harald Reiter is the technical coordinator of MyHeart. MyHeart is a 6th Framework EU Integrated Project under Philips Research Aachen leadership for fighting Cardio Vascular Diseases (CVD) by prevention and early diagnosis. Recently he became the project coordinator of HeartCycle, which is a 7th Framework EU Integrated Project concentrating on compliance and effectiveness in closed-loop disease management.
